

New \$10 Note Update

Issue date: 20th September, 2017

**From Thomas Findlay Group (Aust) Pty Ltd
Authorised Premier Distributors of the
Cashmaster Range of Note & Coin Scales Australia & New Zealand.**

On the 20th of September 2017 The Reserve Bank will be releasing the first of the new generation \$10 notes. All current \$10 notes will be replaced gradually over time with new generation notes.

This image shows the basic design artwork for the signature side of the new \$10 banknote. The white areas are clear windows.

This image shows the basic design artwork for the serial number side of the new \$10 banknote. The white areas are clear windows.

Thomas Findlay Group has been involved in this process from its inception and test weighing of the new \$10 notes has been carried out. Due to a small variance of weight between the old \$10 notes and the new \$10 notes (lighter), we recommend counting loose notes in smaller batches i.e. 20-25 notes rather than 30-40 notes until the majority of old notes are out of circulation.

Older machines i.e. Omega C, Omega CDC, Omega CFC, Sigma 165 and Sigma 100, may be slower to respond due to their older technology.

If you require any further information, please contact
Thomas Findlay Group.
